Dr. Joshua Lederberg
Department of Genetics
Stanford University Medical Center
Palo Alto, California

Dear Doctor Lederberg:

I offer my apologies for not having answered earlier your letter of March 29, 1960--but I have again been on the road and in complicated positions.

I appreciate your suggestion that I offer a critique of the reports that have been submitted, but I am about to head off for Russia for a month and to Europe for an additional period. Consequently, I would not be able to do this at present; in fact, I don't imagine I would have much opportunity to do any reading before leaving on May 3rd.

It is quite possible I shall have a chance to see you at the meetings next week and without apology have a chance to discuss it with you.

Sincerely yours,

Thomas Francis, Jr.

Thomas Francis, Jr., M.D.
